Subject: J.B. King Mine - Brad Johnson Grazing

Tom, I got a call from Buzz Gerick (Western States Minerals Corporation) today and he said that he had been notified by one of his consultants (Jim Blackburn) that parts of the fence were down and cows were grazing on the reclaimed J.B. King Mine site. He also said that Mr. Johnson had put up a salt lick for his cows at the minesite as well.

Mr. Gerick said that he had spoken with Brad Johnson last year and Mr. Johnson "promised not to graze on the reclaimed mine site anymore." A March 1999 Division inspection report documented that the cows at the mine site then.
